WORK EXPERIENCE

Backend Developer — Vednix Technologies ,Indore

Feb,2026-present

• Responsible for building and managing backend architecture, developing scalable APIs, handling database design, and overseeing technical implementation to ensure reliable and efficient application performance.

PROJECT WORK

[1. REPOMIND \(AI GitHub SaaS – Smart Repo Insights & Collaboration\)](#)

Built an **AI-powered** GitHub **SaaS** using **Next.js**, **tRPC**, **Prisma**, and **Clerk** with **Octokit** and **Gemini AI (RAG + vector embeddings)** to deliver repo insights, automated **commit tracking**, context-aware Q&A, meeting summaries, and AI-generated issues from audio.

[2. IDEANODE \(Managing & Organising our SecondBrain\)](#)

Built a full-stack idea management app using **Node.js**, **Express**, **MongoDB**, **React**, and **TypeScript** with **JWT authentication**, **reusable components**, and a **modular, scalable backend API** for efficient idea capture and organization.

[3. NextStep AI\(AI Powered RoadMap Assistant\)](#)

Built an AI-powered roadmap builder using **React**, **Node.js**, and **MongoDB** with **Google OAuth**, generating personalized learning/career roadmaps via AI with a scalable architecture and deployment on **Vercel** and **Render**.

CERTIFICATES

1.C++ Complete Training Course for Beginners (Udemy)

Apr 21,2024

2.SQL and Relational Databases 101 (IBM)

Nov 04,2025
